

Physics ♦ Neuroscience ♦ Supercomputing ♦ Antitrust ♦ Public Policy ♦ Lean Ops ♦ Startups ♦ SciOps

I began in neuroscience and physics, from synapses to superconductors to stealth tech at the Skunk Works. I moved into technology-focused antitrust and constitutional law – the intersection of competition, innovation, regulation, and liberty. For the last 15 years, I've been building 0→1 tech startups. Today, as co-founder of DataJoint, I'm on a mission to create a healthy ecosystem for data-intensive science – one that rewards rigorous work and reproducible results and reduces waste, fraud, and abuse.

PROFESSIONAL EXPERIENCE

SCIENCE: Co-Founder, DataJoint (2022–present)

Strategy and marketing for NIH-backed operating platform for reproducible, AI-ready data pipelines.

- Sparking a “SciOps” movement – like “DevOps for Science” – to transform reliability and speed.
- Delivering 80% reduction in research time and cost and enabling scientists to tackle more complexity.
- Co-developing a new IP licensing model with Harvard designed to monetize scientific software and data.
- Co-author, [SciOps: Productivity and Reliability in Data-Intensive Research](#) (under review by *Nature Methods*).

TECH: Startup Founder / CxO / Consultant (2010–2022)

Policy, infrastructure, and commercialization at the edge of science and technology. *Selected roles:*

- Founder: Smart Tech Foundation (CEO) – created an innovation ecosystem, in partnership with X-Prize, to incentivize R&D of life-saving technologies like secure personalized firearms.
- Executive: Darcy Partners (CTO, upstream oil & gas platform); Landover Wireless (EVP, 5G spectrum acquisition); Sovolve (Product/Engineering, social data network); Fandor (COO, first Netflix competitor).
- VC/PE/CxO Clients: 1517 Fund, Permira, Luminar, Siemens PETNET, Hitachi Vantara.

OPERATIONS: Reengineering Consultant (2007–2009)

Tearing down and rebuilding systems to eliminate waste, reduce risk, and drive value creation.

- McKinsey: transformed US IC information operations; cut an international bank's underwriting cycle time from 45 to 20 days; analyzed and executed operational synergies in pharma & satellite M&A deals.
- MetaJure/Intellectual Ventures: shifted systems and mindsets to minimize IP portfolio risks and costs.

LAW: Antitrust / Appellate / Regulatory Counsel (1997–2007)

Attorney at Gibson Dunn, Jones Day, and US Court of Appeals for the DC Circuit (Clerk to Hon. David B. Sentelle).

- Helped secure President George W. Bush's election victory in *Bush v Gore*: edited briefs, led negotiation and preparation of the joint factual record, and prepared Ted Olson for argument before the US Supreme Court.
- Also with Olson, second-chaired a landmark constitutional case that overturned FCC rules permitting FBI to intercept internet communications without a warrant.
- Represented technology companies (e.g., Intel, Apple, Dell) in DOJ/FTC investigations and private litigation.

EDUCATION

The University of Chicago Law School – JD with High Honors, Olin Prize in Law & Economics (1997)

Harvey Mudd College – BS with Distinction, Physics (1988)

ADDITIONAL INFORMATION

- R Street Institute – Board Member and incoming Chairman (2024–present).
- Green Bag Press – Co-Founder & Executive Editor of a top five law journal (1997–2007).
- TS/SCI/SAP (1988–1990, 2007–08); DC Bar member (inactive).
- *Our First Real War*, 2 Green Bag 2nd 169 (1999) (tracing limits on presidential war powers to lies told to Congress by Thomas Jefferson)
