

CHIRONIC AI

Privileged, confidential legal AI for SMBs,
sold and supervised by the attorneys they already trust.

CHIRONIC.AI • CONFIDENTIAL • AUGUST 2026

“Chiron: the most just of the Centaurs”

HOMER, ILIAD 11.832

Legal questions arise as certainly as death and taxes. *Hourly billing makes most of them irrational to send to outside counsel.*

Shaun MaGruder
CEO • VALKEN INDUSTRIES

Reclassifying as a corporation, he never called a lawyer. **On these numbers he was right not to.**

THE FEE

100%

Certain. Four hours at a blended
[\$1,000].

THE HARM

[5%]

A maybe. And counsel only
shrinks it.

The Hand formula at the margin: spend B only where it beats $\Delta p \times L$, the risk removed times the exposure. *United States v. Carroll Towing Co.*, 159 F.2d 169, 173 (2d Cir. 1947) (L. Hand, J.). The upper curve discounts the harm at a 20% cost of capital over three years; both are assumptions, set out so they can be argued with. Shaun's exposure is an estimate; rates illustrative of a two-lawyer boutique.

Shaun got it wrong. *At a tenth the cost, he would have asked.*

WHAT DOING IT HIMSELF MISSED

- Placeholders left in the cap table
- No board consent adopting the change

Neither was expensive to fix. Both were findable. **Diligence is where they surface.**

The gold curve is the same test with the cost of a review cut to a tenth; the price is not set **NEED: price per seat**. What makes the risk reduction real rather than assumed is that the answer is attorney-supervised. Shaun MaGruder is a client of Breeze Law and the two defects are as he described them.

Improving AI pushes today's legal services model *to the breaking point.*

AI makes it even more irrational to call outside counsel.

The better the free answer, the less a lawyer is left to add.

This is not a behavior change. It is the behavior.

Executives already prefer asking an AI, even with counsel on retainer. We do not resist that. We build for it.

EVEN PUBLIC-COMPANY CEOS – TO THEIR DETRIMENT →

The curve is the small-business break-even from the previous page, unchanged. What moves is the ceiling: as the do-it-yourself answer improves there is less residual risk left for a review to remove, so the exposure that justifies a call runs away. The two ceiling values illustrate the direction; they are not a forecast.

Ask the AI and the transcript is evidence. *Ask a lawyer and it is privileged.*

“Krafton’s CEO consulted an artificial intelligence chatbot to contrive a corporate ‘takeover’ strategy.”

VICE CHANCELLOR LORI W. WILL · DELAWARE COURT OF CHANCERY · OPENING LINE

He asked how to escape a **\$250M** earnout, deleted the logs, and the court reconstructed and quoted them anyway.

Privilege attaches only to a licensed attorney. No AI company can offer it.

What if both had the same answer?

Fortis Advisors, LLC v. Krafton, Inc., C.A. No. 2025-0805-LWW (Del. Ch. Mar. 16, 2026) (Will, V.C.), slip op. 1, 32–36, 63–64. The chatbot exchanges were relied on in the court’s analysis as affirmative proof that the stated reasons were pretextual. Post-trial opinion for the plaintiff; the CEO was reinstated by specific performance and the case settled in July 2026 before the damages phase.

An attorney in the loop delivers both *privilege and reliability*.

- 1 Client asks a question
- 2 Chironic AI answers
- 3 Supervising Attorney optionally adds feedback and direction
- 4 At Client request, Attorney signs off on documents, opinions, or advice

PERIMETER OF PRIVILEGE

Everything inside is a request for legal advice.

The product is built. Alpha this month, *partner beta in September.*

MODULE

Privileged client channels

Client-facing AI counsel.

MODULE

Supervision console

Thread monitoring, risk flags, jump-in, review queues.

MODULE

Attorney workflows

Intake, triage, abbreviated review, full audit trail.

MODULE

Practice knowledge

Firm templates, playbooks, and client context – firm-owned.

Zero-data-retention agreements with Anthropic and OpenAI. SOC 2 Type II expected [early 2027].

Bracketed figures reflect current research and require verification.

Supervision costs so little that legal review can live *inside daily operations*.

THE CLIENT

- Questions once priced out now get asked
- Answers privileged, and safe to rely on

THE FIRM

- Subscription revenue
- Billable review on questions that never arrived
- Privilege over daily operations
- Early visibility on big matters

A thousand of these for a thousand dollars.

Supervision costs so little that legal review can live *inside daily operations*.

An HR manager gets a complaint. She asks the AI, not the lawyer. Privileged. The attorney is alerted.

THE CLIENT

Questions once priced out get asked.

THE FIRM

Billable review. Early visibility.

A thousand of these for a thousand dollars. A dollar each.

Firms are already selling the subscription. We're building *the product that scales it*.

3

FRACTIONAL-GC CLIENTS

At [\$7,500] a quarter, delivered with AI assistance today.

8

HOURLY CLIENTS, WON IN 60 DAYS

[3] converting to fractional GC as the AI lands.

5

DEALS IN PIPELINE

[80%] fractional GC with AI support.

0

CLIENT DEPLOYMENTS

Built and in testing. Friendly-client tests this month.

Amazon built its infrastructure to sell books, then sold the infrastructure. Breeze Law is that first business: it proves the motion, and Chironic sells it to hundreds of firms.

Corporate & securities · Breeze

Healthcare · Ronen

Employment

Intellectual property

Nonprofits

Law-firm ownership rules in [49] states bar non-lawyer ownership of a firm, so the founders build and test through a separate entity, The Breeze Law Firm. Breeze deploys Chironic's technology with its own clients to refine the value proposition, functionality, experience, messaging and pricing – the flywheel, before we spin up hundreds of firms.

[~700K] attorneys in firms of ten or fewer, *serving business clients.*

Small-firm attorneys already
selling business counsel on
recurring terms

All solo and small-firm
attorneys serving business
clients

Plus intake for firms serving
individuals, plus corporate
legal departments

ASSUMPTION CHAIN – NO CENSUS COUNTS LAWYERS BY
CLIENT TYPE

[~700K] × [NEED: % serving business clients] ×

[NEED: % on recurring terms]

seats × [NEED: price per seat] × ramp

[69.7%] of what US law offices bill comes from business clients,
[25.2%] from individuals.

Business/individual split: 2022 Economic Census, Offices of Lawyers (NAICS 541110), class of customer – a share of *revenue*, weighted toward large firms, so it cannot be multiplied against a small-firm headcount. Seat base: the 2005 American Bar Foundation firm-size distribution, the last ever published, scaled to the ABA's 2025 count of 1,374,720 lawyers. No current source publishes a firm-size breakdown; ~700K is a ceiling, not a measurement.

Bracketed figures reflect current research and require verification.

We prime the pump with the best lawyers we know. *Then it grows because it makes sense.*

Chicago Law trains the best law-and-economics lawyers alive, and we know hundreds of them. Two engines after that: clients call us wanting a firm that does this, and partner firms earn [10%] of first-year revenue for introductions.

Bracketed figures reflect current research and require verification.

Everyone else sells BigLaw hours for minutes. We sell small firms *linchpin status*.

WHO	SELLS TO	WHAT THEY ACTUALLY SELL
Harvey	AmLaw 200 and large legal departments	Efficiency on work the firm already bills
CoCounsel THOMSON REUTERS	Broad, the largest installed base	Research grounded in Thomson Reuters content
DIY AI THE REAL SUBSTITUTE	The client directly, for free	An answer with no privilege and no accountability
Chironic	Small and solo firms serving businesses with no counsel	A channel that turns non-clients into subscribers

The linchpin is what the hardware can't communicate without. We sell revenue growth and client penetration, not cost reduction. Small firms that skip AI get marginalized – by peers who don't, or by BigLaw coming down-market.

Startup operators, AI practitioners, and *practicing attorneys*.

Vertical leads are in formation; the labor and employment lead is named on confirmation.

THE ASK

Up to **[\$1M]** to prove the motion *repeats outside our own firm.*

INSTRUMENT

SAFE, rolling close
[12–18] months. Operational at **[\$500K]**.

USE OF FUNDS

Product and engineering	[\$455K]
Go to market and cohort success	[\$185K]
Compliance and SOC 2 Type II	[\$115K]
IP protection and prosecution	[\$80K]
G&A, legal, insurance	[\$100K]
Reserve	[\$65K]

GATING MILESTONE

One vertical with a repeatable motion – **[NEED: N]** firms from **[NEED: N]** qualified conversations at a stable price – and we turn it loose across all **[387]** US metro areas.

ROADMAP

QUARTER	MILESTONE
Q3 2026	Alpha testing; partner beta in September
Q4 2026	Supervised beta across the cohort
Q1 2027	General release; SOC 2 Type II

Metro-area count: OMB Bulletin No. 23-01 (July 21, 2023), List 2 – 387 Metropolitan Statistical Areas in the United States, holding 86.2% of the US population.

Embedded firms are defensible. Firms that wait
for the phone to ring *are not*.

The questions are being asked – of the wrong system.

Only a law firm can answer them with privilege and accountability.

We're the software that lets every small firm do it.

Monty Kosma · monty@chironic.ai
